ACEXPIEL. CELEBRATING 20 YEARS AT ALL CHINA LEATHER EXHIBITION

La Doma SA de Curtidos, Riba Guixà and Inpelsa recognized for their long-lasting contribution to China mainland's only international leather fair.

The Spanish Tanners participation at ACLE 2018 coincides with the 20th anniversary of this international show that first opened its doors in Beijing. With just over 200 square meters and 11 Spanish companies attending All China Leather Exhibition association, within the contingency we have three international companies that have supported this international platform with their continuous presence. The three tanneries mentioned are Inpelsa, La Doma SA de Curtidos and Riba Guixà, all of them considered ambassadors to the Spanish leather in the global fashion arena. The spirit of association and collaboration still remains strong and as recognition of the long-lasting relationship between both parties, Acexpiel has sponsored the ACLE 2018 Gala dinner where Inpelsa, La Doma and Riba Guixa will be rewarded, together with a number of other international companies, their long-term contribution to a market which 20 years ago had just opened its doors. It is also important to highlight that it is companies like the above mentioned that played an important role in the success of a show that began very modestly in Beijing.

Albeit the fact that China is no longer Spain's main export destinations (Europe - Italy and France - being the destination for over 50% of all articles produced in Spain), this market is still strategic for the growth and sustainability of the Spanish leather industry. Proof of this importance is the consolidation of the Spanish Tanners articles in China mainland and the presence of Spanish tanneries at ACLE since the first edition in 1988. However, the slowdown of the Chinese manufacturing industry is confirmed though the ACLE barometer, which has seen a drop of over 200 exhibitors from the 2017 edition.

The Spanish participation is spread between halls E1 – Tanneries and E2, where the visitor can encounter the Spanish participation of chemical and machinery brands.

HALL E1 TANNERIES
